NEW RA177- Series Brake Pins

Subject: RA177-00300, RA177-00400, RA177-01600

Rapco, Inc. announces **NEW** part number and new stainless steel brake pins available.

We have changed the part number of our FAA-PMA Approved RABP-001 to the original part number of RA177-00300. The RABP-002 has also changed to a RA177-01600 which is the OEM number with a "RA" as a prefix to the number and we added a new part: The *RA177-00400 Pin*. All these brake pins are widely used in conjunction with the "Sintered" style brake linings (RA66-33, RA66-62, RA66-66, Etc.). They are staked into place on the back plate and pressure plate assemblies in accordance with the brake maintenance manual.

The RA177-00300 is a 5/16" Pin designed for the back/pressure plates with 5/32" holes
The RA177-00400 is a 5/16" Pin designed for the back/pressure plates with 3/16" holes
The RA177-01600 is a 3/8" Pin designed for the back/pressure plates with 3/16" holes

This new part number and design is a substantial improvement over the original Rapco, Inc. stainless steel rivet-pin design. Also, the approval adds installation eligibility of the pins to new brake assemblies.

These pins are in stock and will sell for **\$3.30 List Price Each**
each, and are packaged in bags of 10.
